Inclusive 60 cm Ultra Clean mop frame with special adaptor. Can be placed against the wall without toppling.

Product information

100-150 cm curved telescopic handle for floor-washing. The curved shape makes it easy to clean under bookcases and furniture contemporary with maintaining ergonomic work postures. The telescopic handle has an angular top, a handle and an internal twist lock. Solid and durable lightweight handle of aluminium. Can be placed against the wall without toppling because of the angular top. As the handle isn't right-angled like traditional handles, it reduces the friction significantly during floor-washing with this handle and mop frame concept. Changing to a 60 cm mop system will be beneficial for many as the friction is extremely low when using this cleaning concept. The handle only fits this mop frame and is only available as a collected set with handle and mop frame.

Washing and maintenance

- Wipe with dampened cloth

Disposal: We recommend disposal at recycling centre.

**Material**

Aluminium/plastic HDPE
